345 COURTLAND STREET, N.E.
ATLANTA, GEORGIA 30365

MEMORANDUM

Title:	<i>Medley</i>
Brk:	<i>3:10</i>
Clk:	

Date: **APR 02 1991**

SUBJECT: REVIEW OF "FINAL REMEDIAL INVESTIGATION REPORT
PHASE I & II, MEDLEY FARM SITE, GAFFNEY, SOUTH CAROLINA,
FEBRUARY 1991

TO: Jon K. Bornholm
Remedial Project Manager
North Superfund Remedial Branch

FROM: Tony Able, Hydrologist, P.G. *T.A.*
Ground-Water Technology Unit

THRU: Rutherford B. Hayes, Chief *R.B. Hayes*
Ground-Water Technology Unit

Per your request review of the subject document has been completed. Specifically we checked to be sure that comments from our review of the Draft RI Report were addressed. The majority of our comments were addressed and the others were deferred to either the Feasibility Study or to the Remedial Design.

It is our understanding that Jones Creek is not the closest discharge area (Pages 10 and 164) to the site, rather the tributary stream northeast of the site is the closest discharge area. This stream should be monitored due to the fact that high levels of contaminants have been detected in nearby monitoring wells SW-108 and BW-108.

If you have any questions concerning this matter contact us at extension 3866.
